

WONNEMANN

H O L Z W E R K

**From the veneer to the exclusive object!
Precisely custom-made for your individual applications**

via the ready-to-install furniture component ...

If you are an interior designer or furniture manufacturer looking for individual veneered components, such as side, base and front panels for your furniture or interior fittings, please contact us.

As a long-standing partner of the furniture industry Wonnemann is able to offer any range of manufacture, lot size and large or small batch series, from the veneer to the ready-to-install, surface-coated furniture component. **The special feature: all production stages are located under one roof.**

Examples of production possibilities:

Grooving: Panel-type workpieces are processed longitudinally and transversely with the double end profiler in a cycle, in which we format, profile, fold, groove, laminate, and much more.

Drilling / milling: Almost every conceivable hole pattern can be processed in panels or furniture components thanks to CNC machining – for mass production as well as for medium and small lot sizes.

Edge processing: You can opt for solid wood strip edging (max. 12 mm), the Wonnemann veneer and a thick veneer edging. Melamine, PVC or ABS edges can also be applied.

Veneer edging: 0.6 mm

Thick veneer edging: 1 - 3 mm

The use of in-house manufactured natural wood edging in processing furniture components guarantees colour consistency.

Coating: The surfaces of flat components are treated in our coating line in an efficient and environmentally friendly manner. Immaterial whether you opt for UV-coating, Proterra, hydro coating, polyurethane coating or other such substance – all coating and etching systems are available for a colourless or coloured finish in different gloss and quality levels. Wonnemann produces the finish according to your colour sample.

Maximum length of workpiece: 4100 mm Maximum width of workpiece: 1250 mm

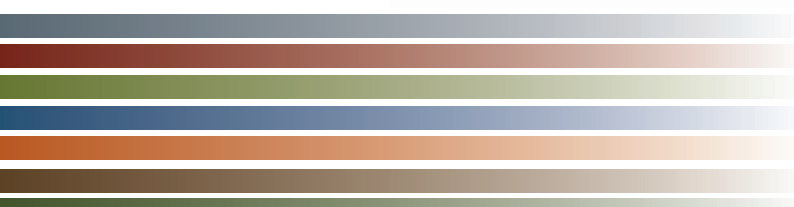

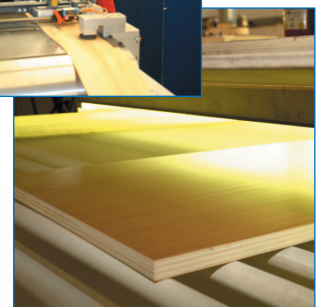

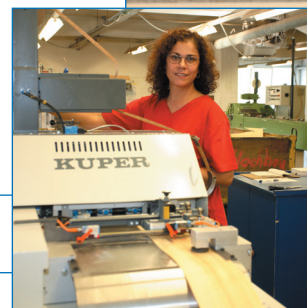

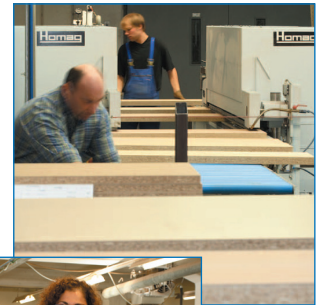

An enquiry form for individual production of your furniture components can be found at: www.wonnemann-holzwerk.de

... to the exclusive object!

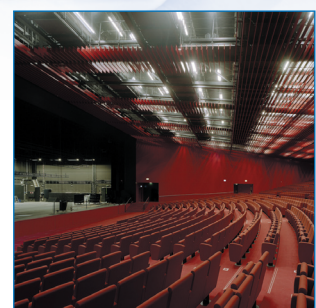

We are confronted with new and challenging project definitions on a daily basis. Do you require a special furniture component or the interaction of different veneered panel products and furniture? We would be happy to advise you.

Wonnemann develops solutions in close collaboration with architects, furniture fitters and end customers. Some of our references: Kreishaus Hameln (Hamelin District Office), KfW Banking Group, Frankfurt, Penta Hotels in Germany and England, the Bregenz Theatre and Dubai International Airport.

Thanks to our technical capabilities, know-how and experience Wonnemann is able to realise customer demands relating to aesthetics, quality and adherence to delivery dates.
