

# Wonnemann - Fancy veneered plywood

## Exclusive plywood for fascinating, unique features!

The quality of **Wonnemann fancy veneered plywood** stems from the use of densely bonded peeled veneer inserts pressed with high-quality veneer which is available in all common wood types.

All sliced and peeled veneers are carefully sorted by hand according to their various quality levels for individual production of the veneered plywood. This allows the veneer qualities I / II on both sides or I / III on one side to be selected as standard. For special applications Wonnemann can realise sliced veneer structures, veneer covers and joint types according to customer requirements.

State-of-the-art processing technology and our long-standing experience with veneers guarantee outstanding Wonnemann products. The peeled veneers are glue jointed, which provides a closed surface. This provides an optimal basis for individual touches and perfect surface finishing.

Exotic wood panels are used in many areas:

- ▶ model building,
- ▶ furniture construction,
- ▶ interior fittings,
- ▶ shopfitting, exhibition and commercial construction,
- ▶ recreational vehicle construction, etc.

Whether they are used for panels, cross lamination, rear walls, drawer bases, doors and panelling, **fancy veneered plywood can create an attractive appearance for demanding living solutions!**

The personal configuration of residential and living space is still in vogue. This means high-grade design, quality, creativity and flexibility are very much in demand. Combinations of materials, such as glass, natural stone, metal and exotic wooden panels are very popular.

High-quality veneered plywood or a selection of other substrates, such as, chipboards, block boards and MDF panels offer many possibilities.

High-quality veneered materials for almost any application!

**Wonnemann fancy veneered plywood** come in a variety of designs. Individual solutions are optionally available for special requirements. Take advantage of our know-how and expertise.
