

# Wonnemann - Block board light

## A TIP for lightweight installation solutions!

3-ply Wonnemann block board light consists of a tightly glued Fuma insert which is surrounded by selected peeled Fuma veneer. The particular advantage offered by this panel is its **extraordinarily low weight of 290 kg/m<sup>3</sup>**, which ensures easy handling and provides the processor with a high degree of flexibility.

The surface of the crossband veneer allows **block board light** to be lacquered, coated or provided with a decorative veneer, which enables the product to be used for many applications:

### ► Stage and exhibition construction

Stage and exhibition construction requires large panel elements that can be assembled and installed in a quick and flexible manner, but which are often only in place for a short period of time. These panels are crucial for staging presentations and messages that need to exhibit a surface such as that provided by block board light, which allows all manner of creative possibilities. The easy handling of block board light, the good screwing qualities and the possibility of reducing transportation costs are particularly advantageous features of the product.

### ► Vehicle, caravan, wagon or ship construction

Panelling and boarding are an integral component of vehicle construction and, as such, are impossible to do without. However, a rule that seems to apply is: the **less weight the better!** Using block board light you can reduce weight whilst simultaneously making use of the stronger panelling material. This enables you to obtain an improved aesthetic appearance.

### ► Furniture and interior fittings

The good processing capabilities of block board light enable a lightweight item of furniture to be produced quickly from a panel. Panelling, shelving units and other carcass components can be produced from block board light for the mobile customer.

### Block board light – a TIP for lightweight installation solutions!

Whether you require a base panel or ready-to-install furniture components – our timber production facility provides a variety of processing and finishing options that you can make use of. Contact us!

Wonnemann block board light is available in a variety of designs to fulfil all of your panel requirements.
